

# BULLSEYE IRON

## FOLIAR & ROOT ABSORBED

Iron targeted to where the plant needs it most.

### GUARANTEED ANALYSIS

Iron (Fe) .....5.0%  
Derived from: Iron Polysaccharide

### NON-PLANT FOOD INGREDIENTS

L-Amino Acids ..... 2.5%  
Derived from: Protein Hydrolysates

Weight per gallon: 10.1 lbs  
pH: 4.5

**Bullseye Iron is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by plants**

The information contained in this brochure is believed to be accurate and reliable. It is provided as a means of explaining the products for the benefit of the potential user. EnP Investments cannot be held responsible for any unintentional errors in description of usage due to errors or omissions. EnP Investments further warrants that the products represented in this brochure conforms to the chemical description and are reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. EnP Investments shall not be responsible for incidental or consequential damages resulting from the use of any product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to EnP Investments.

### BULLSEYE IRON

Two highly effective synergistic chemistries work to optimize absorption and translocation of iron:

1. Amino acid chelated Fe for rapid foliar uptake and rapid color response.
2. Polysaccharide encapsulated Fe for biologically controlled release and prolonged color residual.

EnP Turf presents a revolutionary Iron delivery technology driven by polysaccharide chelation. These carbohydrates protect the nutrient and deliver Iron to the roots. Once inside the plant, this natural sequestering agent is able to move rapidly throughout the plant to ensure quick delivery of Iron to the chloroplasts. Bullseye Iron provides great color for 2 to 4 weeks and even longer in some situations!

### BENEFITS

- Timely delivery of Iron through foliar and root absorption.
- Provides outstanding color for longer periods than other Fe sources.
- Low use rates compared to traditional sources. A five gallon case of Bullseye Iron covers the same acreage as a 30 gallon drum of other Iron products.

### GENERAL USE GUIDE

For use on warm and cool season turfgrass.

**Golf Course Greens, Tees and Fairways  
Lawns and Athletic Fields**

Apply 12 to 16 fl oz per acre in 30 to 90 gal water. Repeat application every 14 to 28 days.
