High Drive 12-0-0 is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by plants

The information contained in this brochure is believed to be accurate and reliable. It is provided as a means of explaining the products for the benefit of the potential user. EnP Investments cannot be held responsible for any unintentional errors in description of usage due to errors or omissions. EnP Investments further warrants that the products represented in this brochure conforms to the chemical description and are reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. EnP Investments shall not be responsible for incidental or consequential damages resulting from the use of any product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to EnP Investments.

HIGH DRIVE 12-0-0

- High Drive gives new seedlings, sprigs and sod a quick, non-burning nutrient surge for faster rooting and plant development.
- The natural additives in High Drive help the plant immediately accept nutrition through the leaf and is rapidly translocated throughout the plant.
- Balanced micronutrient ratios are designed for deep lasting color and foliar performance.
- Carbon sources and plant extracts drive density and lateral growth.
- High Drive helps speed spring transition on warm season turf by improving plant density and maturity.

GENERAL USE GUIDE

Greens and Tees	Apply 1.0 to 3.0 fl oz per 1,000 sq ft as needed.
Fairways and Sports Turf	Apply 1.0 to 3.0 fl oz per 1,000 sq ft as needed.
Aeration Recovery	Apply 2.0 to 3.0 fl oz per 1,000 sq ft. For best results Apply 3 to 5 days prior to aeration and make a second application 7 days after aeration
