

FOLIAR RELIEF

3-7-18

14% phosphite and high K analysis increases vigor and improves plant response during periods of drought, heat, and disease pressure.

GUARANTEED ANALYSIS

Total Nitrogen (N).....	3.0%
3.0% Urea Nitrogen (N)	
Available Phosphate (P ₂ O ₅)	7.0%
Soluble Potash (K ₂ O)	18.0%
Boron (B)	0.02%
Iron (Fe).....	0.10%
Manganese (Mn).....	0.10%
Zinc (Zn)	0.10%

Derived from: Urea, Phosphorus Acid, Tetra Potassium Pyrophosphate, Boric Acid, Iron EDTA, Manganese EDTA, Zinc EDTA

Weight per gallon: 11.52 lbs
pH: 7.05

Foliar Relief 3-7-18 is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by plants

The information contained in this brochure is believed to be accurate and reliable. It is provided as a means of explaining the products for the benefit of the potential user. EnP Investments cannot be held responsible for any unintentional errors in description of usage due to errors or omissions. EnP Investments further warrants that the products represented in this brochure conforms to the chemical description and are reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. EnP Investments shall not be responsible for incidental or consequential damages resulting from the use of any product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to EnP Investments.

FOLIAR RELIEF 3-7-8

Foliar Relief 3-7-18 provides maximum plant response during periods of drought, heat, and disease pressure. Foliar Relief contains multiple forms of phosphorus, high concentration of potassium and key micronutrients necessary for turfgrass to thrive during summer stress. High quality turf when treated with Foliar Relief 3-7-18 will respond with increased photosynthesis and improved overall vigor.

- Quickly absorbed phosphite energizes plant.
- Increases plant antioxidant and ATP production.
- Allows plant to rapidly repair cell damage.
- High K content increases cell strength, drought and disease tolerance.
- Zn ensures optimal antioxidant formation and new tissue development

GENERAL USE GUIDE

Greens and Tees	<p>Cool Season Turf: Apply 3.0 to 6.0 fl oz per 1,000 sq ft every 7 to 14 days throughout the growing season.</p> <p>Warm Season Turf: Apply 4.0 to 8.0 fl oz per 1,000 sq ft every 7 to 14 days throughout the growing season.</p>
Fairways and Sports Turf	Apply 1.5 to 3.0 gal per acre every 14 to 28 days throughout the growing season.
