## WATER SOLUBLE MYCORRHIZAE

Increases the beneficial bacteria and fungi in the soils.

### PRIMARY FUNCTIONING AGENTS

Kelp Extract.....	18.0%
Humic Acid.....	16.0%
Mycorrhizae:	
Glomus intraradices.....	13 prop/gm
Glomus mosseae.....	13 prop/gm
Glomus aggregatum.....	13 prop/gm
Glomus etunicatum.....	13 prop/gm
Glomus deserticola.....	2.5 prop/gm
Glomus monosporum.....	2.5 prop/gm
Glomus clarum.....	2.5 prop/gm
Glomus brasilianum.....	2.5 prop/gm
Gigaspora margarita.....	2.5 prop/gm
Rhizopogon villosullus.....	208,750 prop/gm
Rhizopogon luteolus.....	208,750 prop/gm
Rhizopogon amylopogon.....	208,750 prop/gm
Rhizopogon fulvigleba.....	208,750 prop/gm
Pisolithus tinctorius.....	1,100,000 prop/gm
Suillus granulatus.....	260,000 prop/gm
Suillus punctatapius.....	260,000 prop/gm
Laccaria bicolor.....	83,500 prop/gm
Laccaria laccata.....	83,500 prop/gm
Scleroderma cepa.....	417,500 prop/gm
Scleroderma citrinum.....	417,500 prop/gm

### WATER SOLUBLE MYCORRHIZAE

Contains a blend of endo & ecto mycorrhizae fungal spores, sea plant extract, vitamins, humic acid, amino acids, and a proprietary blend of microbial metabolites that increases the beneficial bacteria and fungi in the soils.

- Improves the bio-activity of poor soils.
- Helps germination of seeds.
- Facilitates root growth in new plantings.
- Reduces transplant shock.
- Use for deep root feedings of established trees and shrubs to improve root mass.

### GENERAL USE GUIDE

<b>Deep Root Feeding</b>	Prepare a 100 gallon tank mix. Add 1/2 to 1 pound package of Soluble Mycorrhizae and circulate until dissolved. Use standard injection and grid pattern for deep root feeding.
<b>Transplanting Trees and Shrubs</b>	Tank mix 1 pound Soluble Mycorrhizae per 100 gallons of water. Soak bare roots and ball stock prior to planting. Finish transplanting by applying liquid as a drench after back filling.
<b>Nurseries</b>	Tank mix 1/2 to 1 pound soluble mycorrhizae per 100 gallons of water. Liberally saturate porous media in seedling bed, trays, and containers.
<b>General Turf Overseeding Sodding</b>	Tank mix 1 pound soluble mycorrhizae with 100 gallons of water. This application should cover 20,000 to 40,000 sq ft.
<b>Root Dip Small Plantings</b>	Dissolve 1 tsp per gallon of water. Soak planting completely. May be repeated every 10 to 14 days during active growing season.
