

Post Game Recovery Program

Foliar Pak nutrient and biostimulant program with L-Amino Acids maximize uptake of nutrients resulting in healthier turf.

Foundation Forty The most comprehensive and concentrated Amino Acid supplement for turf grass. A highly-concentrated, engineered blend of specific amino acids for increased nitrogen fixation, chlorophyll production, energy production and the production of anti stress compounds.

Rate
3 qts
per acre

Full Throttle Natural additives help the plant immediately accept nutrition through the leaf and is rapidly translocated throughout the plant. Drives density and lateral growth. Nutrient and bio-stimulant package specifically designed to strengthen turf, improve respiration and allow for better regeneration of leaf, stem and root biomass.

Rate
1 gal
per acre

Promote Helps maintain proper metabolic function of turf. When applied regularly, turf plants will maintain more balanced growth, greater root mass and remarkable stress tolerance under difficult conditions such as high temperatures, extreme drought, high salinity, low mowing height, high traffic and disease pressures.

Rate
1 gal
per acre

Amperage Combines organic nitrogen with iron, manganese and zinc complexed with natural sugars for optimum nutrient absorption. Energy increases chlorophyll production, photosynthesis and plant carbohydrate levels. Sugars from natural molasses energize plants and microbes with available carbon sources that stimulate biological activity.

Rate
2 qts
per acre
