

Zeta $\not\propto$ Plex™ Iron

4-0-0 WITH MANGANESE

Zeta $\not\propto$ Plex™ Iron is a brand new, unique combination of iron and manganese that is protected by three different natural and modified plant metabolites.

GUARANTEED ANALYSIS

Total Nitrogen (N).....	4.0%
4% Water Soluble Nitrogen (N)	
Iron (Fe).....	4.0%
4% Water Soluble Iron (Fe)	
Manganese (Mn).....	1.0%
1% Water Soluble Manganese (Mn)	
Derived from: : urea, iron sulfate, manganese sulfate	

NON-PLANT FOOD INGREDIENTS

L-Amino Acids	5.0%
Derived from: Protein Hydrolysates	

Weight per gallon: 10.2 lbs
pH: 4.5

Zeta $\not\propto$ Plex™ Iron is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by plants

The information contained in this brochure is believed to be accurate and reliable. It is provided as a means of explaining the products for the benefit of the potential user. EnP Investments cannot be held responsible for any unintentional errors in description of usage due to errors or omissions. EnP Investments further warrants that the products represented in this brochure conforms to the chemical description and are reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. EnP Investments shall not be responsible for incidental or consequential damages resulting from the use of any product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to EnP Investments.

TRIPLE PROTECTED IRON AND MANGANESE

- Improves turf color when added to tank mixes with PGR and certain fungicides.
- Provides proper pH reduction and stability to chemical tank-mix combinations.
- Multiple chelators provide rapid color response as well as longer residual color.
- Soluble organic nitrogen increases uptake and efficacy of nutrients and PGR's.
- Ideal ratio of Fe and Mn provides unsurpassed color response.

Zeta $\not\propto$ plex™ Iron is a brand new, unique combination of iron and manganese that is protected by three different natural and modified plant metabolites. Each plant metabolite performs well in its own niche. The low-molecular-weight plant metabolites allow for movement through the stomatal pores and transcuticular pores; the high-molecular-weight modified plant metabolite chelates the iron and manganese for secondary uptake via the soil. This engineered redundancy ensures rapid uptake for the turf in all growing conditions.

GENERAL USE GUIDE

Golf Course Turf Lawn Care Athletic Fields	Apply 1.0 to 3.0 fl oz per 1000 sq ft in enough water to provide sufficient foliar coverage. Repeat application every 7 to 21 days. During rapid turf growth, higher application rates may be required to maintain the desired turf colour.
Shrubs & Trees Ornamental Plants	Deep Root Injection: Apply 2 fl oz per inch of trunk diameter. Foliar Spray: Apply 15 fl oz in 100 gal water. Soil Applications: Mix 0.5 fl oz per gal water. Apply 2 gal of this solution per square yard of garden. Transplants: Apply 1.5 fl oz per gal water. Apply 1 gal of this solution per inch of trunk diameter
