

# 0-0-25

## POTASSIUM THIOSULFATE

Contains fulvic acids and amino acid polymers to increase nutrient availability and uptake.

### GUARANTEED ANALYSIS

Soluble Potash (K<sub>2</sub>O) .....25.0%  
Sulfur (S).....5.0%

Derived from: Potassium Thiosulfate, Humic Substances, Polyaspartic Acid

### POTASSIUM RATES:

3 fl oz = 0.063 lbs K per 1000 sq ft  
4 fl oz = 0.084 lbs K per 1000 sq ft  
5 fl oz = 0.105 lbs K per 1000 sq ft  
6 fl oz = 0.126 lbs K per 1000 sq ft

K per gallon: 2.98 lbs  
Weight per gallon: 10.9 lbs  
pH: 7.9

**0-0-25 Potassium Thiosulfate is intended as a supplement to a regular fertilization program and may not by itself provide all the nutrients normally required by plants**

The information contained in this brochure is believed to be accurate and reliable. It is provided as a means of explaining the products for the benefit of the potential user. EnP Investments cannot be held responsible for any unintentional errors in description of usage due to errors or omissions. EnP Investments further warrants that the products represented in this brochure conforms to the chemical description and are reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. EnP Investments shall not be responsible for incidental or consequential damages resulting from the use of any product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to EnP Investments.

### 0-0-25 POTASSIUM THIOSULFATE

- 0-0-25 Potassium Thiosulfate is a high analysis liquid potash fertilizer that may be used in soil and foliar applications.
- Multiple carbon compounds improve nutrient uptake by complexing potassium and improving cuticle penetration.
- 0-0-25 is an effective method of correcting low potassium levels in soils and plant tissue.
- Improves plant vigor during stress periods by helping plants regulate water use and transpiration.
- Potassium is necessary for protein development and converting simple sugars to carbohydrates.

### GENERAL USE GUIDE

<b>Greens and Tees</b>	Apply 3.0 to 6.0 fl oz per 1,000 sq ft
<b>Fairways, Lawns and Sports Turf</b>	Apply 1.0 to 2.0 gal per acre every 2 to 4 weeks. Warm season turf may require more frequent applications to achieve desired results.
